January 2011

Save up to 20% on Residential Electricity

Energy Savers, Inc. has launched a Residential Electricity Program available to residents serviced by **Duquesne Light, PPL, and PECO** and offers discounts of up to **20%** below the utility's Price To Compare (PTC) depending on the term you select.

- Electrical Power
- Natural Gas
- Demand Response
- Consulting

Delivering
Reliable, Low Cost
Energy Services
Since 1982

The enrollment is online and you simply enter a small amount of information about yourself along with information from your electric bill, select the length of contract, read a plain language disclosure and agree to the terms and conditions. With the click of a mouse your enrollment is complete and savings will start with your next meter reading and you will continue to receive one bill from the utility.

By participating in the program your savings will increase as the economy recovers. Rate caps have expired throughout Pennsylvania. Under deregulation's new guidelines, electric utilities are permitted to adjust

their rates throughout the year to reflect their actual cost of electricity, and then pass rate increases on to you. Under our program, your price will not change and you can maximize your savings by enrolling for the longest term available.

To Enroll Visit our Website at:
